Interesting offer for your industry:
Company for Steam Turbine & Turbine Component for sale

Steam Turbine

The steam turbine is the very heart of the power plant, a component that you count on to carry out its work without interruption.
As a number of steam turbine power station is built, we have realized the importance and economical efficiency of steam turbine maintenance.

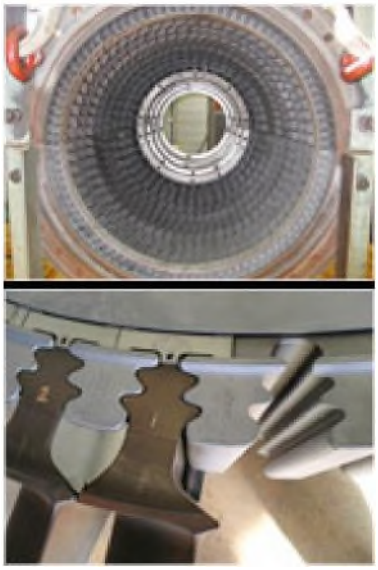

Field of Steam Turbine service:

- Overhauling Steam Turbine
- inspection all of the internal part(included NDT)
- Blasting all of the internal part for effici Rotor Balancing check on 150 1940 standard
- Reblading Rotor blades and Guide blade carriers
- Generator overhauling
- Reduction Gear overhauling
- Repair all of internal parts an original designed measure standard
- Spare parts

Gas Turbine

The constructed factory equipped with technical man power and latest equipments. The gas Turbine factory can establish a service shop with comprehensive maintenance system and keep localization of maintenance technology and consistent maintenance system for gas turbine generation equipments.

Field of Gas Turbine services:

- Turbine component refurbishment
- Reproduction/repair and manufacture of gas turbine
- Reproduction/repair and maintenance of large industrial facilities
- Large rotor repair & Balancing
- Turbine component development
- Spare parts

Interesting offer for your industry:
Company for Steam Turbine & Turbine Component for sale

The Factory Reading and *the Key Component*

The company specializes in turbine overhauls and component repair projects that demand highly qualified and experienced personnel.

Company's key components include:

- Hot section blades, Nozzle segment
- Turbine disc assemblies and rotor assemblies
- Compressor section blades and inlet guide vane stators
- Interconnect shafts
- Precision ground gears
- Boost compressor impellers and turning vane assemblies
- Skid ancillaries

The component production centers in Asian Country are equipped with latest in design technology.
Many components - OEM are available for immediate dispath to the customer, and 23 hour on – call support for emergency product deliveries is also offered to minimize equipment downtime.
Furthermore, an e-commerce capability enables customers to purchase some spare parts online.

Spare Parts

The company specializes in turbine overhauls and component repair projects that demand highly qualified and experienced personnel.
Chances are that even if we don't stock it we can rapidly locate someone who does.

This Company is a major contributor to the world wide steam & Gas turbine industry by servicing both the OEM and the component repair market.

This Company meets the demands of the these markets through its strong engineering staff, highly trained operating personnel and very efficient utilization of its capital in \vestment.

Interesting offer for your industry:
Company for Steam Turbine & Turbine Component for sale

Maintenance

This Company is full service provider of scheduled and unscheduled maintenance and repair service.

This Company is a major contributor to the world wide.

The Service Capabilities:

- Operation, Maintenance Service
- Field Engineering
- Inspection Engineering (NDT, Vibration...)
- Installation, Commissioning
- Equipment Upgrade
- Refurbish Service
- Repairs
- Training

The company's products products support overhaul and field maintenance for the steam & gas turbines.
Ws also hold on an unsurpassed inventory of turbine components for gas boost compressor and mechanical driven equip

We Provide

The Company 0ffers a wide range of service:
The Company is a totally independent turbine overhaul company offering "Full service support"

The Company Provides realized the importance of consistent and thorough maintenance of plant equipment and systems.
Plant owner with high capital investments are concerned with getting the most out of their facilities for the longest operating period possible.
The personnel have the skills and experience to perform tasks ranging from routine maintenance to complicated plant system improvement

In serving the Power industry, tihis Company has or continues to:

- Annual maintenance services
- Outage maintenance services
- Turbin - generator inspection and overhauls
- Procure materials and equipment needed to complete each project

The Company is ready for your next emergency or on site consultation project:

- Gas turbine operational and diagnostic consulation
- Turbine engine disassembly
- Turbine and component inspection
- Turbine Engine reassembly
- Technical direction
